

The Washington Flag Congress 2011

COLOPHON

The 40 essays presented in these *Proceedings* were provided by the authors in Microsoft Word. They were vetted by Program Chair Gustavo Tracchia with the support of the Congress Scientific Committee. Original formats were maintained as much as possible, to preserve their individual characters—while at the same time adapting them to a consistent style, including abstracts, footers, dates, punctuation, and pagination. Copyediting was performed by Edward B. Kaye. Documents were compiled into pdf format using Adobe Acrobat Professional 8. The cover art was designed by Melissa Meiner in Adobe InDesign CS4. CDs were produced by Bison Optical Disc in Orlando, Florida. The hard-copy version is available through www.lulu.com. The ICV 24 flag was designed by Tony Burton of Milsons Point, Australia.
